INVESTMENT PARTNERS

Our network is backed by strategic partners such as Astatine, emphasising our commitment to delivering speed, scalability, and reliability. Glide's mission is to continue pushing boundaries, making the complex simple and creating a connected world that thrives on efficiency and innovation.

Our mission:

Deliver connectivity to difficult to serve markets while creating great customer loyalty.

It's as simple as that.

The four pillars that make this up:

1. Providing excellent service at a fair price: At Glide, our commitment to customer loyalty begins with delivering outstanding service that goes above and beyond expectations, all while ensuring fairness in pricing. We believe in building trust through transparent and competitive pricing, creating a foundation for enduring customer relationships.

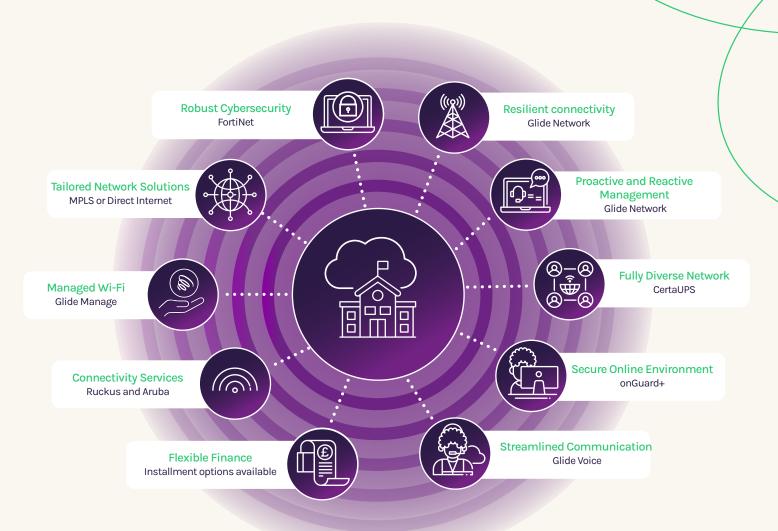

2. Innovating new products and services to save our customers time and money:
We constantly strive to pioneer inventive solutions that meet and exceed our customers' needs. Our dedication to innovation is driven by the desire to streamline processes, saving valuable time and resources for our customers while offering cost-effective alternatives that enhance their overall experience.

3. Using the best and most relevant technology to provide an efficient and effective service: Embracing cutting-edge technology, Glide ensures our customers a seamless and efficient experience. By staying at the forefront of advancements, we guarantee that our services are effective and tailored to meet our customers' evolving needs in an ever-changing digital landscape.

4. Employing good people and encouraging and training them to make the most of themselves: At the heart of our mission is a team of dedicated individuals who are skilled and empowered to reach their full potential. Through continuous encouragement and training, we foster a work environment that benefits our employees personally and professionally and translates into exceptional service delivery for our valued customers.

Empowering Education And Connecting Futures

Overview of Glide Education

Case Studies

A School in South West England

Challenge

A primary school experienced network issues, with an outdated infrastructure affecting connectivity and hardware integration.

Solution

Participating in the 'Connect the Classroom' initiative, the school underwent upgrades, including installing Cat6a cabling, improved fibre optic infrastructure, and modernised distribution cabinets. These changes created a more dynamic and connected learning environment.

Result

The implemented solution, featuring a new fibre optic backbone, 37 cabling points, and upgraded cabinets, successfully transformed the school into a technologically advanced institution, seamlessly integrating technology with education.

A School in Northern England

Challenge

A primary school faced infrastructure challenges, with ageing buildings posing obstacles to technology integration.

Solution

A strategic project aimed at enhancing network capabilities and overcoming unique construction hurdles by installing Cat6a cabling to provide fibre connectivity and streamline students education, while also leveraging existing infrastructure.

Result

Despite facing term-time restrictions, the collaborative effort laid a robust foundation, demonstrating adaptability and resilience for a technologically advanced future.
