

# Glide Education: Manage

In today's digital landscape, effective management and security of educational networks are pivotal responsibilities. Glide Education's Manage service is a robust solution designed to provide schools with a hassle-free, fully managed experience for their complex networking needs.

A robust and dependable Wi-Fi infrastructure is fundamental for the success of modern education, supporting the integration of technology in the learning process and preparing students for the demands of the digital age. Our goal is to empower schools and MATs to concentrate on their core competencies without the additional challenge of overseeing their complex network infrastructure. Glide Manage acts as a strategic outsourcing partner. We design, procure, coordinate, build and then manage the network for you. This allows you to redirect internal resources toward essential initiatives while ensuring compliance with DfE requirements for digital safety and reliable connectivity.

## Our Comprehensive Solution

### Networking services

- ✓ The latest managed wired and wireless network technology.
- ✓ Roaming on a private, secure network, anywhere in the school.
- ✓ The newest and best infrastructure equipment for optimal network connectivity.
- ✓ Multi-site WAN solutions for complex networking needs.
