

# Glide Education: Protect

Glide Education Protect seamlessly integrates Fortinet's Fortigate Security, Netsweeper's onGuard+, and our national networking connectivity services to safeguard the privacy and data of schools and students across a hybrid IT infrastructure, ensuring an optimal user experience.

This unified framework, incorporating coordinated and automated threat protection, eliminates the necessity for multiple security point products. By simplifying operations and enhancing network efficiency, it guards against cyber-attacks and harmful content while maintaining high availability across school network resources. This achievement establishes a robust security posture, ultimately leading to improved productivity.

## Our Flexible Solution

### Managed Security (Firewall)

Offer a range of physical or virtual hosted firewall solutions, including Unified Threat Protection, High Availability, and Geo-resiliency topologies.

### Application Control

Quickly create policies to block or restrict access to unauthorised applications, enhancing security compliance.

### Network and Data Protection

Safeguard against network-based and file-based threats with Intrusion Prevention (IPS) services, including protection against DoS and DDoS attacks, while also detecting, preventing, and blocking malicious activities on the network. Additionally, it utilises advanced antivirus features for deep packet inspection, checking against a signatures database to remove and report the latest viruses and spyware.

### AI-detected, human verified digital safeguarding from Netsweeper

Designed to enhance your existing security procedures, we utilise real-time, proactive monitoring to flag potential risks to student safety. Content filtering provides another layer to ensure threats are minimised.

### Remote Connectivity Solutions

Encrypt all traffic from remote staff and teachers' computers and send it through an SSL VPN tunnel, providing client-based VPN for remote access from anywhere. Connect remote offnet networks to your corporate network securely through a site-to-site VPN.

### Uninterruptible Power Supplies (UPS)

To safeguard your school from power issues, invest in a reliable uninterruptible power supply (UPS). At Glide Education, we partner with Certa to offer customised UPS solutions. With Certa's 20+ years of experience, we provide tailored UPS options and maintenance for educational facilities.

# Our Protect Service

## An Expert Approach to Digital Safeguarding

Our comprehensive student safeguarding service from Netsweeper is based around web content filtering, proactive monitoring, management and event alerts, offering peace of mind so you can stay on top of student safety.

## Educational Continuity

Enjoy real-time, off-site air-gapped data backup services with end-to-end encryption and scalable resources, for uninterrupted productivity to staff and students.

## Access to FortiGate NGFW Technology

Glide Education provides FortiGate Next-Generation Firewall (NGFW) technology, which is recognised as the most deployed and trusted network firewall. FortiGate has consistently been acknowledged in the Gartner Magic Quadrant for Network Firewalls for 13 consecutive years.

## Converged Connectivity and Security

Glide Education integrates networking connectivity with Fortinet's FortiGate NGFW, ensuring a unified solution that safeguards schools and students.

## Centralised and Unified Management

Our security solution features centralised and unified management, effectively coordinating diverse security domains into a single IT security solution. This ensures automated protection extending from schools to the cloud and remote staff.

## Deep Visibility for Applications, Users, and Devices

Glide Education offers deep visibility into applications, users, and devices, providing better insights to improve pupil outcomes. Advanced data collection and analysis techniques enable identifying and controlling all network users, applications, and devices.

## Tailored Fully Managed Solution

Glide Education understands that every school is unique. Hence, we provide a tailored, fully managed security solution designed to meet the specific needs of your school. Our service supports this solution and grants access to our technical expertise.

## About Glide

With **35 years of experience**, our market-leading position as a provider of managed Wi-Fi services in the UK extends across diverse sectors such as student, residential, businesses, and flexible workspaces, where we bring innovative asset classes to life. **Our extensive network boasts 400,000 users**, spans 1,500 km of dark fibre, encompasses 14 fibre cities deployed, and **features over 200 UK fibre points of presence**, solidifying our commitment to delivering cutting-edge connectivity solutions.

Transform your educational environment with Glide's comprehensive safeguarding solutions.
