

MANUFACTURING,
WAREHOUSING, LOGISTICS

Connecting complexity from factory to floor

Reliable Wi-Fi solutions & connectivity designed specifically for your business

Stay connected,
stay secure,
stay in control

Connectivity challenges faced in MWL environments

Connectivity blackspots

In warehouses and manufacturing floors, metal structures and expansive layouts can cause Wi-Fi signals to drop – interrupting vital processes.

Downtime is costly

Every minute offline equals lost productivity, delayed shipments, and increased costs.

In complex environments, standard Wi-Fi doesn't cut it

Traditional Wi-Fi often struggles in industrial conditions, disrupting automation, IoT deployments, and real-time inventory tracking.

IT resource constraints

Managing connectivity internally drains valuable resources away from your core business.

Wi-Fi designed specifically for MWL

Glide doesn't offer "one-size-fits-all." Our connectivity solutions are carefully tailored to meet the unique operational demands and complexities of manufacturing, warehousing, and logistics environments.

We work closely with your team to understand your specific challenges – whether it's signal interference from heavy steel structures, the critical need for seamless automation, or the necessity of constant connectivity across vast facilities. With Glide, you gain a connectivity partner committed to ensuring your network supports productivity, growth, and innovation, now and into the future.

Seamless, reliable connectivity

- Fully managed Wi-Fi ensures 24/7 uptime.
- Tailored to your environment (steel structures, automation, robotics).

Automation-ready networks

- Reliable connectivity for Automated Guided Vehicles (AGVs) and robotics.
- Supports real-time IoT sensor integration.

Real-time asset visibility

- Precise tracking with Radio-frequency identification (RFID) and Bluetooth integration.
- Reduce asset loss and downtime.

Enhanced workforce mobility

- Workers stay connected seamlessly across expansive sites.

Superior safety and security

- Reliable connectivity for CCTV, access control, and regulatory compliance.

Future-proof infrastructure

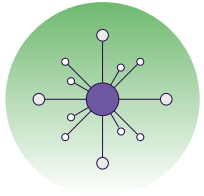

- Scalable networks easily accommodate growth and new technologies (Industry 4.0).

Our comprehensive solutions for manufacturing, warehousing & logistics

At Glide, connectivity is just the beginning.

Alongside our trusted managed Wi-Fi, we provide a comprehensive suite of advanced solutions designed specifically to support the complex and demanding environments within the MWL sector.

Connect

Leased lines

Dedicated, reliable, high-performance connectivity ensuring guaranteed uptime and consistent speeds critical for real-time operations and data-intensive tasks.

Fibre connectivity

Scalable, ultra-fast fibre connectivity tailored to your specific operational and site needs, ideal for smart factories and automated warehouses.

Dark fibre

Ultimate control and virtually limitless bandwidth to meet your most demanding data requirements, future-proofing your operations for rapid growth and technology advancements.

Mobile data backup

Ensuring continuous connectivity for mission-critical applications and emergency failover.

By partnering with Glide, your MWL business benefits from end-to-end managed solutions tailored specifically to your unique operational challenges and growth ambitions. From connectivity to cybersecurity, infrastructure to innovation, we've got you covered.

Protect

Cybersecurity solutions

Robust security services, including advanced firewall solutions (virtual and physical), VPN and Zero Trust Network Access (ZTNA) to safeguard your data and critical business operations.

Uninterruptible power supply (UPS)

Maintain continuous operation and safeguard against costly downtime with reliable backup power solutions, ensuring your business-critical systems remain always-on.

Manage

Managed Wi-Fi

Fully managed, proactively monitored networks delivering high reliability and operational consistency, no matter the complexity or scale of your environment.

Professional services

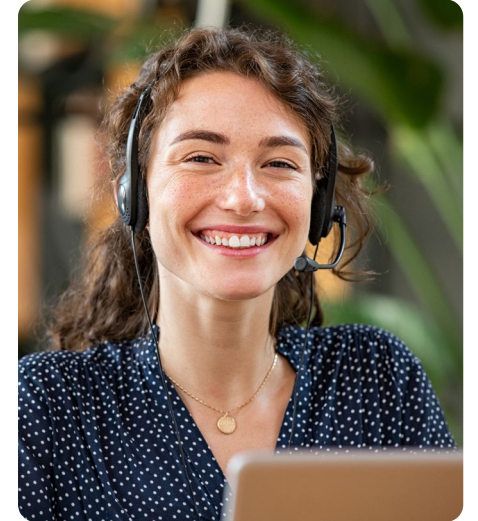

Expert support ensuring your connectivity is optimised, correctly implemented and continuously managed, allowing your team to remain focused on operational excellence.

The benefits you'll experience

Partnering with Glide means more than reliable Wi-Fi - it means unlocking clear operational advantages.

Here's how we help transform your connectivity into tangible business outcomes:

- ✓ **Increased operational efficiency**
Reduce downtime with uninterrupted connectivity.
- ✓ **Improved productivity**
Empower your team with mobile, real-time connectivity.
- ✓ **Reduced costs**
Simple monthly pricing with no hidden surprises.
- ✓ **Enhanced safety and compliance**
Reliable security system performance.
- ✓ **Sustainability gains**
Real-time monitoring to support ESG goals.
- ✓ **Simplified IT**
Let Glide manage connectivity, freeing your team for strategic tasks.

Why Glide?

- ✓ **Experienced and proven**
Over 35 years delivering connectivity in complex, hard-to-serve environments.
- ✓ **Fully managed service**
Expert support, proactive monitoring, and quick issue resolution.
- ✓ **Tailored solutions**
Networks designed around your operational requirements, not ours.
- ✓ **Always-on support**
Our UK-based team is available around the clock.
- ✓ **Proven performance**
Guaranteed service levels and proactive maintenance ensure peace of mind.

Connect. Protect. Manage.
